To assist the ISCAS Secretariat in planning adequate seating at tutorials, please indicate which sessions you wish to attend :

Full Day

- System-On-Chip (Soc) Technology : The Future of VLSI Design
- Recent Advances in Verification, Equivalence Checking & SAT Solvers
- High-Performance Design Techniques in Nanometer Integrated Circuits
- CMOS Imagers: From Phototransduction to Image Processing
- Design for Testability of Analog and Mixed-Signal Integrated Circuits
- Microsystems and Nanotechnology and Their Applications
- Chaotic and Random Point Processes: Analysis, Design and Application to Hybrid Systems

Half Day – Morning Sessions

- Challenges in Wireless Multimedia
- Analog Multirate Signal Processing
- Systematic biasing of transistor circuits
- Ultrawideband Radio Communications
- Cryptography in Wireless Protocols: Hardware and Software Implementations

Half Day – Afternoon Sessions

- Lossless Data Hiding: Fundamentals, Algorithms and Application
- Analog Adaptive Filters
- Oscillators and Frequency Synthesizers
- Trends and Fundamentals in Modeling/Simulation of High-Speed VLSI Interconnects
- Chip-Package Co-Design of RF Mixed Signal Microsystems
